

A what each split withholds

grey discs are Bemis-Murcko scaffold classes,
computed on the desalted parent

random 10-fold

scaffold 10-fold

held out: scattered
through every class

held out: one whole
class, absent entirely

• in training this fold

• held out this fold

B the cost of withholding it

median cost 0.028 AUROC
(range 0.012 to 0.056)

C all folds, not only means

each point is one fold;
the rule is their mean
